

helioCORE 2.2.49 release notes

Product	helioCORE
Version	2.2.49
Release date	2021-12-01

User features:

- Configurable network settings: Enable/Disable lights on WAN.

System Updates and other fixes:

- Fixed issue with sensorHUBs reconnection after reboot.
- SensorHUBs that have been disconnected for 7+ days no longer triggers notifications.
- Buttons added for System Backup/Restore. [Feature coming soon!]
- Fixed issue where individual lamps where not able to blink.
- User can no longer have two groups with the same name.
- Fixed wrong text on 'Back'-button on Day-page.
- Fixed typos in GUI.
- Dropdowns now expands also when the text or the box is clicked. No need to click the small "arrow".
- The list of grow zone cards on the Grow Zones page is now sorted in the order they were created.
- "null" entries are now replaced with "0" in downloaded data.
- Y-axis of graphs are now always starting at 0.
- Fixed issue with enabling sensors where the user had to save settings before enabling the sensor. Now settings can be saved at the same time as enabling the sensor. User also get proper feedback for these actions.
